ANALYSIS

The attached draft ordinance amends the General Definitions Section (1.2.1) of the Land Development Regulations of the City Code (LDRs) to create an exception to the definition of floor area for gender neutral restrooms.

Gender neutral restrooms have several benefits, including creating a safe and accessible environment for all people. This includes accommodating people with special needs, families with small children, elderly individuals with a caregiver, as well as transgender and gender non-conforming individuals. Exempting such restrooms from floor area calculations is intended to encourage their use by allowing the square footage of such facilities to be allocated for other uses in a building.

RECOMMENDATION

In view of the foregoing analysis, staff recommends that the Planning Board transmit the proposed Ordinance to the City Commission with a favorable recommendation.

SECTION 1.2.1. – GENERAL DEFINITIONS

* * *

Floor area means the sum of the gross horizontal areas of the floors of a building or buildings, measured from the exterior faces of exterior walls or from the exterior face of an architectural projection, from the centerline of walls separating two attached buildings. For the purpose of clarity, floor area includes, but is not limited to, stairwells, stairways, covered steps, elevator shafts at every floor (including mezzanine level elevator shafts), and mechanical chutes and chases at every floor (including mezzanine level).

For the avoidance of doubt, unless otherwise provided for in these land development regulations, floor area excludes only the spaces expressly identified below:

- a. Accessory water tanks or cooling towers.

- b. Uncovered steps.
- c. Attic space, whether or not a floor actually has been laid, providing structural headroom of less than seven feet six inches.
- d. Terraces, breezeways, or open porches.
- e. Floor space used for required accessory off-street parking spaces. However, up to a maximum of two spaces per residential unit may be provided without being included in the calculation of the floor area ratio.
- f. Commercial parking garages and noncommercial parking garages when such structures are the main use on a site.
- g. Mechanical equipment rooms located above main roof deck.
- h. Exterior unenclosed private balconies.
- i. Floor area located below grade when the top of the slab of the ceiling is located at or below grade. However, if any portion of the top of the slab of the ceiling is above grade, the floor area that is below grade shall be included in the floor area ratio calculation. Despite the foregoing, when the top of the slab of an existing ceiling of a partial basement is located above grade, one-half of the floor area of the corresponding floor that is located below grade shall be included in the floor area ratio calculation in the following instances:
 - 1. Existing contributing structures that are located within a local historic district, national register historic district, or local historic site.
 - 2. Structures located within Block 1 Properties as more specifically defined in section 7.2.15.3.f.1.D.
- j. Enclosed garbage rooms, enclosed within the building on the ground floor level.
- k. Stairwells and elevators located above the main roof deck.
- l. Electrical transformer vault rooms.
- m. Fire control rooms and related equipment for life-safety purposes.
- n. Secured bicycle parking.
- o. Restrooms permitted and maintained as either unisex or general neutral, as more specifically defined under the applicable building code.

Volumetric buildings, used for storage, where there are no interior floors, the floor area shall be calculated as if there was a floor for every eight feet of height.

When transfer of development rights are involved, see chapter 2 article XIV for additional regulations that address floor area.

SECTION 2. REPEALER.

All ordinances or parts of ordinances and all section and parts of sections in conflict herewith are hereby repealed.
