Design Narrative

Haddon Hall design in 1939 by Lawrence Murray Dixon is a premium example of Streamline Moderne highlighted by profiles of clean contours and horizontal planes and colorful terrazzo flooring. This stunning example is nestled inside a city and neighborhood layered with a foundation of Spanish Mediterranean architecture like the charming and historic Espanola Way. This new hotel, built in the frame work of the existing Streamline Moderne, will connect and bridge those two worlds in a modern way. Starting with a site foundation that echoes the Spanish foundations of the region, mosaics and colorful patterns layered with the beautiful Terrazzo floors of the existing lobbies. Growing out of this foundation of color and detail a new modern adaptation of Streamline Moderne will extend and link the individual historic buildings and the new hotel building. This new Streamline Moderne, will reflect the horizontal planes and clean curves of the historic with a nod to the present. Similar but new and distinct. Subtle arches provide depth and anchor the project with similar details to the facades of Espanola Way.

DESIGN NARRATIVE

R0-05

The Banyan Tree

The Banyan tree, the ancient symbol for growth, strength, and enlightenment is rooted in religion and mythology. This unique flora, grows and expands as new trunks develop from roots that drop down from the branches above. This connection and expansion creates a dense connecting canopy for ideas and contemplation to flourish. Our courtyard is anchored by a beautiful and mature Banyon along Washington Ave in front of the historic Campton Apartments. This tree has long anchored this site and has inspired the design for the new Hotel that much like the Banyan tree is a connection and expansion of the original Haddon Hall Hotel on Collins Avenue. Vertical details with horizontal plans branch out and connect the two historic buildings along with the new Guestroom tower. Vast terraces and roof decks extend amenities and activities up into the canopy for activation and views to the ocean. This architecture bridges, both figuratively and literally, to unify the unique collection of structures into a singular establishment to house new growth for the surrounding community.

ARCHITECTURAL INSPIRATION
R0-06

The Spanish Foundation

The Spanish influence of Miami is reflected in the area's culture, food, music and architecture. Due to Miami Beach becoming a hub for those who sought refuge from the Cuban Exile in 1933, it is no surprise that over 70% of the area's residents are Hispanic. Tiled roofs, Spanish baroque decoration, wrought iron balconies, stucco finished walls and arched opens lines the streets of Miami Beach serving as an attraction to tourist and drawing in those most appreciative of the culture and architecture.

Streamline Moderne

Inspired by the Art Deco Movement around the 1930s and 1940s, Streamline Moderne made its way to Miami Beach in such a way as to repeat similar characteristics of the Art Deco style but in a more horizontal fashion. The styles' key features include: rounded corners, curved glass, ribbon windows flat roofs, pastel colors and smooth wall finishes.

MiMo Miami Modern

Originated in Miami in the 1940s and 1950s as a local adaptation of the modern architectural movement that was popular around the world at the time. MiMo buildings were designed to respond to the subtropical climate and the booming resort economy of the time. Known for their playful and whimsical style, which contrasted with the more minimalist styles that were popular after World War II. The style often features: Acute angles, delta wings, sweeping curved walls, metal louvers, sunshades, open balconies, transparent building facades, angled roofs, curved stairways and winding catwalks.
