AS TO VERTICAL CONTROL:

By scaled determination the subject property lies in Flood Zone AE, Base Flood Elev. 9 feet, as per Federal Emergency Management Agency (FEMA) Community—Panel Number 120651, Map No. 12086C0317, Suffix L, Revised Date: 09—11—2009. Base Flood Elevations on Flood Insurance Rate Map (FIRM) for Miami—Dade County are referenced to National Geodetic Vertical Datum of 1929 (N.G.V.D. 1929). These flood elevations must be compared to elevations referenced to the same vertical datum.

An accurate Zone determination should be made by the preparer of the map, the Federal Emergency Management Agency, or the Local Government Agency having jurisdiction over such matters prior to any judgments being made from the Zone as noted. The referenced Federal Emergency Management Agency Map states in the notes to the user that "this map is for insurance purposes only".

4. ACCURACY:

Horizontal Accuracy:

The accuracy obtained for all horizontal control measurements, based on a 95% confidence level and office calculations of closed geometric figures, verified by redundant measurements (based on the direct distance measurement between the two corners being tested), meets or exceeds the commonly accepted value in the Construction and Surveying Industry equivalent to a linear standard closure of 1 foot in 7,500 feet for Suburban Areas.

Vertical Accuracy:

The elevations as shown are based on a closed level loop to the benchmarks noted above and meets or exceeds a closure in feet of plus or minus 0.05 feet times the square root of the distance in miles, a commonly accepted value in the Construction and Surveying Industry.
