SUBJECT: HPB24-0644, 100 Lincoln Road CU-1.

Please provide a narrative response to the comments listed below.

I. DEFICIENCIES IN PRESENTATION

1. Sheet A4.01, note states "remove existing stucco wall" at upper façade. Is the wall being removed or the stucco finish? Please Clarify.

[Applicant Response: Clarification of walls vs finishes provided on Sheet A4.01.](#)

2. The storefront windows appear to be over 12'-0" tall. Please confirm you can find available impact rated glass with such a height. A transom may need to be introduced. Additionally, the proposed elevation drawings appear to show butt-glazed storefront windows but the renderings show black framing. Please clarify.

[Applicant Response: Report included with submittal showing approved product for 144" tall glass. The top and bottom glazing channel are to be recessed. The glass is butt glazed and the elevations and renderings now show this consistency. This is achievable with the proposed system and is shown in the product report.](#)

II. DESIGN/APPROPRIATENESS COMMENTS (Recommendations)

1. Staff recommends that the ends of the upper projection element taper back to the wall.

[Applicant Response: Applicant explored tapered solution in design phase but found that a rounded solution was more successful and also had a relationship to the design language of the building which has rounded profile at the corner.](#)

2. Staff recommends that applicant work with the owner(s) of the adjacent 4 retail units along Collins Avenue to, at a minimum, extend the vertical fin façade treatment proposed for the lower portion of the store to the upper façade of the 4 retail bays.

[Applicant Response: While Applicant agrees that extension of the screen element along the length of Collins Avenue frontage would be better, Applicant does not have an agreement with the owner of the adjacent units to allow the extension of new finishes over the existing tenants. With that, we request that the proposed design be reviewed as presented.](#)

3. Staff recommends that the inspirational images be updated to better reflect the inspiration for the currently proposed vertical fin façade treatment.

[Applicant Response: Inspirational images have been updated accordingly. See Sheet A6.0](#)

4. Staff recommends in lieu of black, a lighter color for the window and door frames and the cladding for the kneewall.

[Applicant Response: The elevations and renderings have been updated using a lighter color for the window and door frames and the cladding for the kneewall.](#)
