

GENERAL NOTES:

1. This form contains information specific to the Federal and State guidelines and standards for the preparation of traffic control plans and for the execution of traffic controls in urban areas for the construction and maintenance operations and utility work on highways, roads and streets on the state highway system. It contains requirements in traffic signs, signals, flagmen, and other sign, signal or flagman personnel. The purpose of this form is to ensure that all projects meet the minimum requirements provided by the MUTCD.
2. Use this form in accordance with the Plans and Indices 102-691 through 102-840. Indices 102-801 through 102-850 are Department-specific types of applications or commonly encountered situations. Adjust designations or number thereof as recommended by the Missouri Traffic Engineer and approved by the Engineer. Divisions include, but do not limit the flagsmen, portable application and flagman personnel. The Department will provide the appropriate application applicable to the project. Department criteria for use, changes and document the reason for the change.

Work Zone Speed (mph)	Min. Length (feet)
≤ 40	$L = \frac{WS^2}{60}$
≥ 45	$L = WS$

Where: W = width of offset in feet
S = speed in mph

Work Zone Speed (mph)	Mile Length (feet)
25	155
30	200
35	250
40	305
45	360
50	425
55	495
60	570
65	645
70	730

Note: When Buffer length "B" cannot be attained due to geometric constraints, use the greatest length possible.

SYMBOLS:

-  Work Area
-  Channelizing Device
-  Work Zone Sign
-  Type III Barricade
-  Lane Identification and Direction of Traffic

17

NOTE:
Configure work operations to the following lane or lane combinations.

- a. Outside travel lane
- b. Outside auxiliary lane
- c. Inside travel lane and adjoining auxiliary lane
- d. Inside travel lane
- e. Inside auxiliary lane
- f. Inside travel lane and adjoining auxiliary lane

If the work area is confined to an auxiliary lane, the work area must be barricaded before the RIGHT (LEFT) LANE CLOSED (AHEAD) signs with RIGHT (LEFT) AHEAD signs, and omit the merge symbol signs and arrow board.

DETOUR OVERVIEW

NOTES:

- 1. L = Taper Length
- 2. B = Buffer Length
- 3. X = Distance from barrier to end of work zone
- 4. Provide a 5' x 5' passing space for temporary pedestrian ways less than 5' in width at intervals not to exceed 200'
- 5. When temporary pedestrian ways require curb ramps, meet the requirements of FDOT 502.002. Detectable warnings are not required for curb ramps over pedestrian ways.
- 6. The "Speed Limit Reduced When Workers Present" signs (W20-13-4b) and "End Road Work" signs (W20-13-4c) along with standard work zone signs may be omitted when the work operation will be in place for 24 hours or less.
- 7. Pedestrian Diversion Option 2 may still be used when called for in the Plans or as authorized by an Engineer.

SYMBOLS:

- Temporary Pedestrian Way
- Channelizing Device (See Table 102-400)
- Pedestrian Longitudinal Channelizing Device (LCD)
- Work Zone Sign
- Air Line Board
- Cushion
- Line Identification and Direction of Traffic
