1. Which material do you prefer for the Ocean Drive sidewalk?

- ● Cast-in-Place Concrete   161
- ● Concrete Unit Pavers   294

35% / 65%

2. Considering the vast variety of colors available for both cast-in-place concrete and concrete unit pavers, the consultant has reviewed these options within the context of the Art Deco Historic District. The recommendation is that the selected sidewalk color should harmonize with, rather than compete against, the vibrant colors and character of the historic Art Deco buildings along Ocean Drive.

Accordingly, the consultant has suggested two color schemes:
(a) soft, muted neutral tones such as natural concrete gray, lightly tinted warm grays, and beiges, or
(b) the distinctive Miami Beach Red, prevalent throughout the city.

Which color scheme do you prefer for the new Ocean Drive sidewalk?

- ● Neutral color palette   136
- ● Miami Beach Red   320

30% / 70%

3. Of the paving options presented, which one do you prefer?
   To view the images larger, please do the following:
   - From your computer: Right-click the image and select "Open image in new tab" from the options provided.
   - From your mobile phone: Press and hold on the image

- ● Option 1: This design draws inspiration from the three-band Art Deco motif, incorporating... — 107
- ● Option 2: Inspired by the wave geometries of the shoreline, also known as the 'swash zone,'... — 61
- ● Option 3: This design reflects the playful geometry typical of Art Deco style but adopts... — 119
- ● Option 4: Drawing on the gradient qualities observed in the interplay of color grains... — 30
- ● Option 5: Similar to Option 04, this design modifies the gradient to create an undulating... — 56
- ● None of the above. I prefer concrete sidewalks; not pavers. — 82
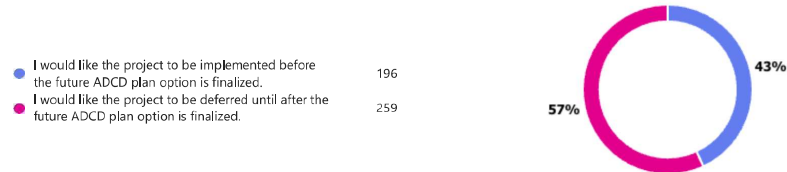

4. How do you feel about the Consultant's recommendation to defer the installation of POLE-MOUNTED lights until the construction of the ADCD option on Ocean Drive occurs? (Please note that the City Commission has not made a selection on which of the 3 ADCD traffic options they prefer, as those options are still undergoing their required traffic study, and a recommendation has yet to be made to Commission by the consultant.)

- ● I agree with deferring the installation of POLE-MOUNTED lights for this short-term project.   367
- ● I would like to see POLE-MOUNTED lights installed now and later moved to an alternate location when...   90

20%

80%

5. Do you support the recommendation to add PALM-MOUNTED ring lights for this short-term project?

- ● Yes   368
- ● No   89

19%

81%

6. Given the lack of consensus at the meeting, we are seeking your opinion on this matter.

- ● I would like the project to be implemented before the future ADCD plan option is finalized.   196
- ● I would like the project to be deferred until after the future ADCD plan option is finalized.   259
