#### 7.1.7.3 Color selection procedures and review criteria

- a. The city exterior color review chart (color chart).
  1. A pre-approved color chart shall be available in the planning department. An applicant for a building permit for paint or the application of a building surface material shall select a color of equal or lesser intensity than a color intensity from the color chart.
  2. The city exterior color review chart shall consist of the following components:
    - A. City-wide color intensities. These intensities shall be applicable to all structures, except for contributing structures, buildings, improvements in locally designated historic districts and historic sites.
    - B. Historic district color intensities. These intensities shall be applicable to contributing structures, buildings and improvements in locally designated historic districts and to historic sites.
    - C. Mediterranean revival architecture colors. These colors are applicable only to Mediterranean revival architecture buildings and structures and are limited to natural earth tones as represented by examples on the color chart. For purposes of this section 7.1.7.3.a.2.C, Mediterranean revival architecture shall be defined as those structures built between 1915 through 1940. This style is generally characterized by, but not limited to, stucco walls, low pitch terra cotta or historic Cuban tile roofs, arches, scrolled or tile capped parapet walls and articulated door surrounds, or Spanish baroque decorative motifs and classical elements.
  3. Colors commonly described with terms such as neon, fluorescent, day-glo, iridescent and similar terms shall not be permitted to be applied to the exterior surface of any structure unless such color has been approved by the design review board or joint design review board/historic preservation board, as applicable.
- b. Permit required.
  1. A building or structure shall not be painted or have applied a natural or manufactured material as an exterior facade without first receiving a building permit or paint permit pursuant to the applicable requirements of the Florida Building Code and the city's land development regulations. No building or structure shall be painted or have a material applied to the exterior facade, except in a paint color or material approved pursuant to the provisions of this section 7.1.7.3.b.

2. Permits for repainting of existing structures or painting of new structures, or applying a natural or manufactured material to an exterior facade, shall not be issued until either: (a) the applicant selects a color from the approved color chart for approval of paint permit application, or (b) has a specific color, not represented in the color chart, or a specific color which may require approval of the design review board or historic preservation board as applicable. This provision does not apply to single family homes unless designated historic or located in a historic district.
  3. If the building or structure to be painted, or surfaced with a natural or manufactured material, requires a permit or approval in addition to a paint or material approval from a board or the planning, design and historic preservation division, the applicant may submit an application for a building permit or board approval simultaneously with an application for paint or material color approval. However, a certificate of occupancy, certificate of completion, or certificate of use, whichever is requested earlier, shall not be issued until the planning, design and historic preservation division or design review or historic preservation board, as applicable. The planning director shall have the authority to approve or deny the color selection based upon the criteria as set forth in section 7.1.7.3.c. The criteria listed in section 7.1.7.3.c may be utilized for projects being reviewed by the design review or historic preservation board, as applicable.
- c. Review criteria.
1. The exterior of each wall of a building or structure shall be in a color of equal or less intensity than one of the colors on the city exterior color review chart.
  2. Color intensities greater than those represented on the city exterior color review chart may be utilized only for purposes of emphasizing trim and accenting architectural features of a structure and shall be limited to the trim.
  3. Color intensities listed in neighborhood plans or, to the extent applicable, listed in exterior design guidelines adopted by the city commission may be used, in the neighborhoods or areas defined in such plans or guidelines, in lieu of those specified in the city exterior color review chart.
  4. Colors selected shall be appropriate to the architectural style, ornamentation, massing and scale of the structure.
