Re: Arts & Culture Bond Grant Project Scope Change

Dear Maria:

New World Symphony respectfully requests the following change to our list of approved projects:

- REMOVE new pergola for the roof garden at New World Center,
- ADD new cameras and robotic control system for the Michael Tilson Thomas Performance Hall in New World Center.

The funding allocation under the approved GO Bond grant to NWS will remain the same with no incremental cost to the City. NWS will be responsible for any costs of this new project in excess of amounts approved by the City of Miami Beach.

This request reflects a priority reassessment for constructing a pergola on our roof garden versus approaching end-of-life for our current camera system. Our cameras and robotic control systems are at the heart of most of the activities at NWS including WALLCAST® concerts, webcasts, and educational activities (eg, masterclasses, distance learning, and remote connections with living composers). These systems also provide support for rental activities in the performance hall which have included City of Miami Beach Mayoral "State of the City" addresses, the Aspen Institute, and many other community activations.

Separately, I have provided you with more detailed specifications and current pricing for the new camera system and robotics. We will re-bid this in the spring of 2025 with the expectation that the work will occur during the summer of 2025. This timeframe fits within the current schedules for completion of all NWS GO Bond funded projects in Tranche One.

Thank you for your consideration of this change.

Sincerely,

David J. Phillips  
Executive Vice President, Facilities and IT
