Planning Landscape Review

1. Landscape plans must clearly define all planting boundaries and extents of lawn areas. Ground cover and shrub areas shall be called out and quantified to match the proposed planting schedule. Lawn areas shall be defined and called out with square footages for each area.

Response. The landscape plans have been completed and now clearly define all planting boundaries and extents of lawn areas. We add a rendered landscape plan for more clarity. Ground cover and shrub areas have been specified and quantified to align with the proposed planting schedule. Additionally, lawn areas have been defined and labeled with square footage on plant list.
